Franklin Peonies

TIME TO PLANT

Peonies may be planted any time in the fall from the first of September until the ground freezes. We begin shipping the first week in September.

CULTURE

Peonies do well in any good garden soil which is well drained. Open sunlight or only partial shade is preferred. Full instructions will be furnished with each shipment.

SIZE OF ROOT

We strongly recommend planting standard divisions of three to five eyes, but owing to an increased demand for smaller divisions we are also listing divisions of at least two eyes on all varieties where the standard division price is five dollars or more. Where one is willing to wait longer for results these small divisions make it possible to secure a collection of the choice varieties with a smaller outlay of cash, but where quick results are desired, which is usually the case, the standard divisions should be planted.

OUR GUARANTEE

We exercise great care in handling and shipping our stock to prevent varieties becoming mixed and guarantee plants sent out to be true to name. If an error should occur, however, we will gladly rectify it.

TERMS

Our terms are cash with order or before shipment unless credit has already been established.

C. O. D. orders must be accompanied by at least one-half of the amount in cash.

SHIPMENT

We have found express to be the most reliable means of shipping peonies and will ship that way unless otherwise arranged. If Parcel Post shipment is desired sufficient postage must be included with remittance. Excess postage will be returned.

Franklin Seedlings

Below are listed a number of Mr. Franklin's seedling peonies, representing a very careful selection from many thousands grown by him during the past twenty-five years. In making these selections, careful comparisons have been made with the best originations of other growers. They are all free bloomers, and good, strong growers. No hard or waterlog bud kinds among them. They have all been given a thorough test and several of them have carried off prizes in competition with originations of other growers. They were never placed in competition until the season of 1920 when they carried off 1st, 2nd and 3rd prizes. This performance was repeated the season of 1921 at the Northwestern Peony & Iris exhibition and the Minnesota State Horticultural Society. They represent the cream of many years painstaking work and careful selection.

The plants sent out will be found large, healthy and vigorous and we feel confident will give real satisfaction.

A. M. SLOCUM. (No. 170) A white, loosely built flower of rose type, very attractive. Central petals slightly edged crimson. Golden stamens intermixed throughout the petals give the flower a creamy effect. Good grower. Free bloomer. S. D., \$8.00; L. D., \$15.00.

BALL O' COTTON. (No. 69) Chaste pure white. Delightfully fragrant. Rose type. Flower resembles LeCygne very much but possesses more fragrance. Good grower. Flower medium size. A very promising variety. S. D., \$12.50; L. D. \$25.00.

COMET. (No. 32) Light red in color. Bomb type. Broad outer petals. Central petals narrow. Resembles Felix Crousse in form but lighter in color. Fragrant. S. D., \$1.50; L. D., \$3.00.

C. W. SCHOCK. (No. 7) Full, double, rose shape flower. A very unusual shade of red, has no lustre. Medium tall, good grower and bloomer. S. D., \$2.00; L. D., \$4.00.

CRYSTAL LAKE. (No. 133) Dark, rose lake color. Exceedingly vigorous grower. Does not fade in the sun. Golden anthers prominent surrounding center of flower. Semi-rose type. A most attractive variety. S. D., \$2.50; L. D., \$4.00.

EDW. W. BECKER. (No. 171) White, shaded light flesh color. A very large, flat flower measuring 8 inches or more on specimen bloom. Mild fragrance. Free bloomer. A very attractive, semi-rose type flower. S. D., \$3.00; L. D., \$6.00.

ELEANOR ANN SMITH. (No. 119) Opens a dark pink, fading slightly. Large bloom, good grower, fragrant. Very attractive golden anthers prominent throughout the flower. Loosely built type of bloom. S. D., \$3.00; L. D., \$6.00.

HETTIE ANN. (No. 141) Practically the same description as Eleanor Ann Smith, but a much darker pink and does not fade as much. S. D., \$3.00; L. D., \$6.00.

JUNE DAY. (No. 11) Color light flesh, deepening toward center of flower. Rose type. Some of the central petals slightly edged with lavender. Delicate rose fragrance. Carried off first honors at 1921 exhibition of the Northwestern Peony & Iris Society as the best seedling exhibited. A wonderfully attractive flower that should be in every choice collection. Extra fine. S. D., \$12.00; L. D., \$20.00.

LAKE O' SILVER. (No. 308) Light pink, silver tipped. Golden anthers prominent throughout flower. Central petals darker pink. Large bloom, 7 to 8 inches. Extremely free bloomer and desirable. S. D., \$3.00; L. D., \$6.00.

MARY P. KING. (No. 112) Even shade of light coral pink on outer petals deepening toward center of bloom. Central petals delicately margined with lavender. A prolific bloomer and good multiplier. Mild and pleasing fragrance. One of the most admired in our trial beds. A charming flower. S. D., \$5.00; L. D., \$10.00.

MABEL L. FRANKLIN. (No. 8) Outer petals light pink shading to darker pink toward center of flower. Short, creamy petals intermingled near the crown of the flower add greatly to its beauty. Inner petals slightly edged with lavender. Delightfully fragrant. This is one of Mr. Franklin's best originations and a prize winner. A splendid acquisition. S. D., \$7.50; L. D., \$15.00.

MINNETASKA. (No. 81) A very prolific bloomer of clear, dark pink, margined and tipped silver. Golden anthers prominent. Fragrant. A splendid landscape variety. S. D., \$2.50; L. D., \$5.00

NOKOMIS. (No. 92) A very attractive bloom of semi-rose type. Fragrant. The attractive feature is the marking of central petals. Flower light pink. Central petals imbricated, golden stamens mixed with dark vermillion red. S. D., \$3.00; L. D., \$6.00.

O-PE-CHEE. (No. 82) Dark red, loosely built flower. Golden anthers prominent throughout the flower. Attractive bloom. S. D., \$2.00; L. D., \$4.00.

PETAGRA. (No. 17) Light red with crown petals surrounded with golden anthers. Fragrant. Guard petals large, showing light green stripe on lower side. Very large bloom, strong grower. Specimen bloom measured 9 inches in diameter. S. D., \$3.00; L. D., \$6.00.

PONEMAH. (No. 79) Even shade of most beautiful pink shading to lighter pink at edge of petals. Flower opens flat and of enormous size. Specimen blooms measured 9 inches in diameter. Central petals lacinated. Outer rows of petals broad. Delightfully fragrant. Sturdy grower and bloomer. Very desirable. S. D., \$2.00; L. D., \$4.00.

QUEEN OF HEARTS. (No. 101) Loose rose type. Light pink fading slightly in sun. Attractive bloom with strong, rigid stems supporting bloom erect. Fragrant. S. D., \$2.00; L. D., \$4.00.

RED BIRD. (No. 14) Bomb type. Color outer guard petals rose red, central petals lacinated and of a darker shade. Fragrant. S. D., \$2.00; L. D., \$4.00.

REVERIE. (No. 34) Large, rose type flower. Color opening in the bud, red, fading to dark pink. Golden anthers throughout flower entirely concealed. S. D., \$2.00; L. D., \$4.00.

SERENE. (No. 44) Full, rose type, medium size, pure white with edging of carmine on central petals. Upright, stiff stems. This variety awarded first prize at Minnesota State Horticultural Society's exhibit as best seedling exhibited. Possesses very pleasing fragrance. S. D., \$3.00; L. D., \$6.00.

TONKA. (No. 117) Color white. Dwarf grower. Bomb type. Petaloids visible. Very slight and pleasing odor. L. D., \$2.00.

WAH-WAH-TAY-SEE. (No. 12) Dark pink, fading to silver pink at edge of petals. Central petals do not fade. Golden stamens prominent in center of flower. Very attractive variety. S. D., \$3.00; L. D., \$6.00.

W. F. CHRISTMAN. (No. 36) Color flesh pink. No stamens visible. An exceedingly attractive flower and delightfully fragrant. Outer guard petals broad and of splendid substance. Central petals narrower and lacinated. Full rose type. A strong grower and sure bloomer. Considered by Mr. Franklin one of his very best. S. D., \$6.00; L. D., \$12.00.

WENONAH. (No. 68) Large dark pink, tipped and edged with white. Loose, rose type. Yellow stamens prominent throughout flower. Good bloomer and sturdy grower. S. D., \$3.00; L. D., \$6.00.

GENERAL COLLECTION FALL 1925

In addition to the description and name of originator we have given the rating as determined by the American Peony Society Symposium. This appears in the column ahead of the name and is a guide to the general desirability of the variety. Those which are not rated are of recent origin and have not been voted upon.

9.0 A. P. SAUNDERS. (Thurlow 1919.) Large flesh white flowers changing to nearly pure white in center. Guard petals sometimes marked carmine. Petals long and curved giving magnolia bloom effect, except center petals which form a ball until flower is well developed. S. D., \$10.00; L. D., \$20.00.

8.5 ADOLPHE ROUSSEAU. (Dessert & Mechin (56) 1890.) Purplish garnet, very large, semi-double. Exceptionally tall. Early. One of the darkest. L. D., \$1.50.

8.7 ALBATRE. (Crousse 1885.) Crown shape, (62) large, milk white, center tinged lilac. Medium tall. Early midseason. Fragrant. L. D., \$1.00.

8.6 ALBERT CROUSSE. (Crousse 1893.) Large, (58) compact bomb type. Very fresh salmon pink. Upright grower, medium tall, fragrant. Late. Very distinct and valuable variety. L. D., \$1.00.
